**ST.GERMAIN COLLINS ACQUIRES BLACK POINT ENVIRONMENTAL**

WESTBROOK, Maine (April 2, 2014) - We are pleased to announce that St.Germain Collins has acquired Black Point Environmental, LLC. This merger will expand our environmental and engineering team, allowing us to offer a larger array of consulting services to a more diverse client base. We are confident that this merger will only improve our level of service and commitment to our clients.

Donald McFadden, President of Black Point Environmental, will join the St.Germain Collins team as Senior Project Manager. Don will continue to serve his existing clients and provide expanded services to our clients. Don specializes in environmental risk management – providing due diligence services to lending institutions, law firms and commercial real estate developers throughout Maine. In addition to his environmental investigation and remediation work as a Maine Certified Geologist, Don also has expertise in water resource management, from permitting gravel pits and quarries for the aggregate industry to ensuring that fire professionals have access to adequate water capacity to protect homes and businesses in rural Maine.

If you would like to know more about these services, we encourage you to contact Don directly at donm@stgermaincollins.com, at (207)591-7000, or on his cell at (207) 329-4007.

Founded in 1992, St.Germain Collins is an environmental consulting and engineering firm providing senior level management to clients in the areas of site planning and development, energy, petroleum and waste management, site investigation and restoration, water resources and environmental, health and safety compliance. More information is available at [www.stgermaincollins.com](http://www.stgermaincollins.com).
